

## IT project manager

A proficient and astute PMP certified project management professional, offering 10+ years' project management across retail, banking, and telecommunications industries, and driving the successful execution of mid-level to large-scale projects. Analytical investigations, cost-effective time management and excellent problem solving have contributed to operational excellence, delivering projects on time, to budget and to scope. A dynamic leader with proven ability to promote collaboration between multifunctional teams and to employ strong resource management skills to achieve optimal project success. Have been exposed to the agile environment and have obtained Agile PM accreditation in 2017. Have also been managing strategic and transformation programmes and have acted in the role of Programme Manager for Sales & Distribution within MTN (Mobile Technology Network).
