

Graphic Designer

I have worked in the field of graphic design for over 15 years, gaining experience in several areas of graphic design - creating corporate identities, artwork for print advertising, magazine layouts and end of year reports amongst others. Regarding design software, I am completely conversant with Adobe Illustrator, Adobe Photoshop and InDesign. I also possess good understanding of preparing artwork for various printing techniques and related issues. I am fully fluent in English, having been born and spent a significant number of years in the UK. I was awarded a BA (Hons) in Graphic Design with Animation from the University of Technology through the Fashion and Design Institute, Mauritius, which I passed with First Class Honours and was named Top Student.
